

Hardware::BBB::CapeLoaded

```
graph LR; eQEP[Hardware::eQEP::eQEP] --> CapeLoaded[Hardware::BBB::CapeLoaded]; PWM[Hardware::PWM::PWM] --> CapeLoaded;
```

The diagram illustrates a class hierarchy. A central box on the left, labeled 'Hardware::BBB::CapeLoaded', is shaded gray. To its right, two white boxes are stacked vertically. The top box is labeled 'Hardware::eQEP::eQEP' and the bottom box is labeled 'Hardware::PWM::PWM'. Blue arrows point from each of these two boxes towards the 'Hardware::BBB::CapeLoaded' box, indicating that both 'eQEP' and 'PWM' inherit from 'CapeLoaded'.

Hardware::eQEP::eQEP
